CELL FREE DNA ANALYSIS

I have been notified by The Comprehensive Care Center that a 2015 study in the New England Journal of Medicine has shown that cell free fetal DNA analysis is beneficial to all pregnant women and not just high risk populations.

I understand that because The American College of Obstetricians and Gynecology does not recognize this test to be essential for routine prenatal care and is not always covered by insurance if I do not meet the criteria to be considered high risk.

I am aware that The Comprehensive Care Center offers the Harmony Cell Free Fetal DNA Analysis and the out of pocket cost of this test is **\$130** which **I will be responsible for should my insurance not cover it.**

Please Check One:

_____ I choose to have this test done

_____ I choose to decline this test
